CENTRAL INTELLIGENCE AGENCY
OFFICE OF SCIENTIFIC INTELLIGENCE

26 March 1951

SCIENTIFIC INTELLIGENCE MEMORANDUM, 51-1

SUBJECT: The Impact of Technological Developments Upon the Prospects for an Adequate Western European Defense

The attached paper was originally prepared on 18 January 1951 as the OSI contribution to NIE-13, Prospects for an Adequate Western European Defense, and includes data on U. S. weapons development and procurement. Because of the decision not to include U. S. "operational information" in NIE-13, the paper is being disseminated separately within CIA for the information of the National Estimates Board.
